

# Hot Melt Repair Service

## Heated Hose Refurbishing

This month we are highlighting our  
**Hose refurbishing.**

Call us today and get that clogged hose cleaned and back to NEW condition. We even replace bad RTD sensors.

You will not be disappointed with the results of our cleaning process!

1. We test your hose and replace the RTD if necessary (additional charges apply).
2. We chemically strip the glue and char from the inside of the hose.
3. We insure that no glue or chemical residue remains.
4. We clean or replace all fittings, cuffs, and cordsets.
5. We replace the hose cover and repair any damage to the insulation.

Get those old clogged hoses that are sitting on your shelf cleaned and save money.

| Description               | Price    |
